

<b>PROJECT TITLE</b>	Maiden Beech Academy- 1627
<b>CLIENT</b>	Maiden Beech Academy
<b>ARCHITECT</b>	LED Architects
<b>CONTRACT VALUE</b>	£658,000
<b>COMPLETION</b>	2019

The works involved the removal of all existing windows and the installation of new double glazed aluminium windows and doors to the whole of the main school building and Art Block B on the school grounds. The works also included replacing the dilapidated cladding to the main school building and replacement of the existing fascia rain water goods and asbestos soffit. This included the removal of any asbestos packers surrounding the windows or enclosed in the window panels, putty or mastic. Main Block A – windows & doors were replaced on the ground and 1<sup>st</sup> floors of this building, including cladding, rainwater goods, fascia & soffits. Art Block B – windows & doors were replaced on the single storey including replacement soffits. Works were coordinated in a live environment and phased to ensure minimal disruption to teaching activities.

***“The project has been well managed, not just in the last month but throughout the project. The project is almost at completion ahead of time and we are very pleased with the results 5\* Excellent” Maiden Beech Academy***
