

PROJECT TITLE	Wellesley Park Primary School -1639
CLIENT	The Castle School
ARCHITECT	Grainge Architects
CONTRACT VALUE	Futures For Somerset
COMPLETION	£419,443

The project comprised the re-roofing of the existing single storey building, currently with failing felt covering in a live environment, including upgrading of insulation and replacement of rooflights with some refurbishment of fascia's and gutters. Throughout the project area the roofs were overlaid with additional insulation and IKO roofing system. Where blistering damage was identified these were repaired prior to overlaying. New downpipes were installed to the main hall upstand and extended to gutters further away from vulnerable elevations. Asbestos was removed from internal rooflight cheeks, reinstated with plasterboard and decorated.

"The site agent been extremely helpful on all matters 4"* The Castle Partnership
